

The moon we watch is the same

Babe it sure been some time
Been smoking pot and drinking wine
Nothing I do can make me get you of my mind
Susana its bad, Susana I am sad, when your not around

Winters here but its far from gone
I'm walking down the street alone
Thinking of some warmer days
Susana you and I walking down the street in the hot summer night

I know the distance is long
But the moon we watch is the same
And when you watch its bright light in the night
Listen closely now babe, and you can here me sing your song.

It's a cold winter after noon
Inside I feel like I'm in June
Cause when I se you sunny smile
Susana I feel good, Susana I feel fine, as long as you stay mine

I know the distance is long
But the moon we watch is the same
And when you watch its bright light in the night
Listen closely now babe, and you can here me call your name.

Spring is coming slow but sure
With it the tunes we've heard before
Birds are singing, we are fine
Susana you look good, Susana you look swell, Susana I love your smell

No more distance between us
We watch the moon together in the night
And when the pail moon light reflects in your eyes
What a sight, I could stay here all night long
